2. Sprint 1 Burndown Report

Sprint 1 Burndown Chart

Sprint 1 Burndown Details

TIME				Story Points		
Date	Issue	Event Type	Event Detail	Inc.	Dec.	Remaining
26/Aug/26 12:36 PM	CROW-4	Sprint start		-		
	CROW-5			-		
	CROW-9			-		
	Total					0
26/Aug/26 12:37 PM	CROW-4	Burndown	Issue completed	0	0	
26/Aug/26 6:26 PM	CROW-9	Burndown	Issue completed	0	0	
	CROW-5	Burndown	Issue completed	0	0	
	CROW-4	Sprint ended by xyz				-
	CROW-5					-
	CROW-9					-
	Total					0

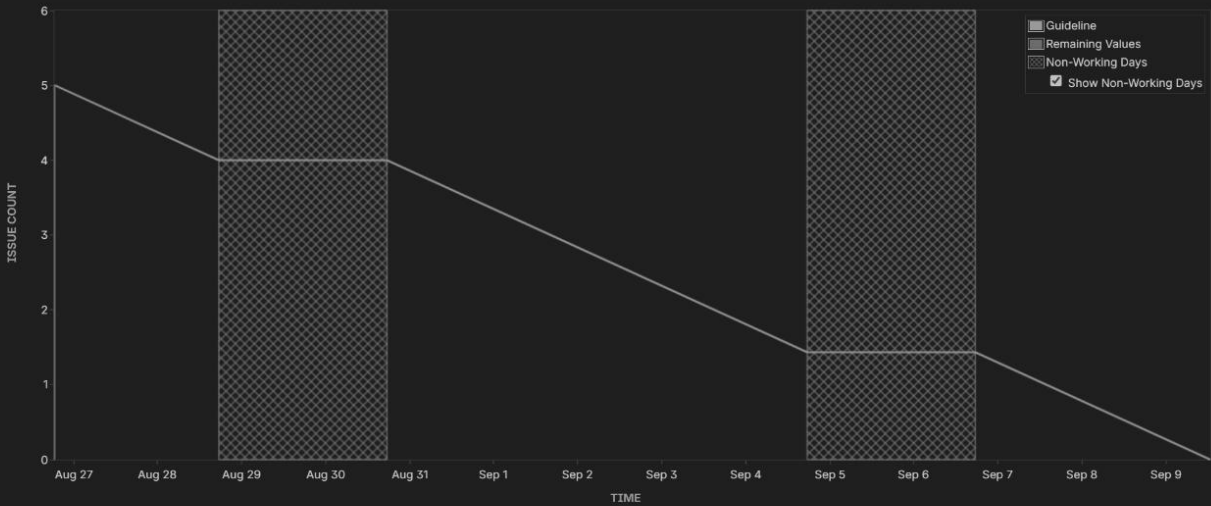

Sprint 1 Burndown Progress

Burndown Chart

How to read this chart

Track the total work remaining and project the likelihood of achieving the sprint goal. This helps your team manage its progress and respond accordingly.

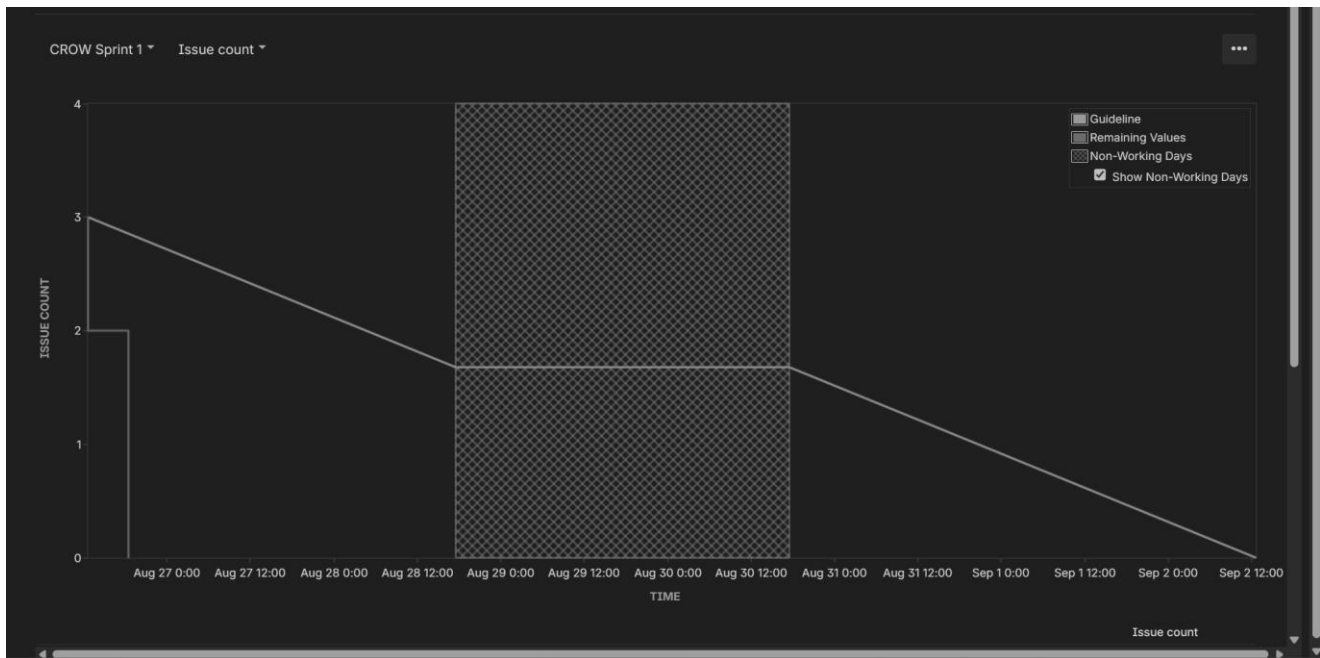

CROW Sprint 2 Issue count

Issue count

3. Sprint 1 Completion and Sprint 2 Report

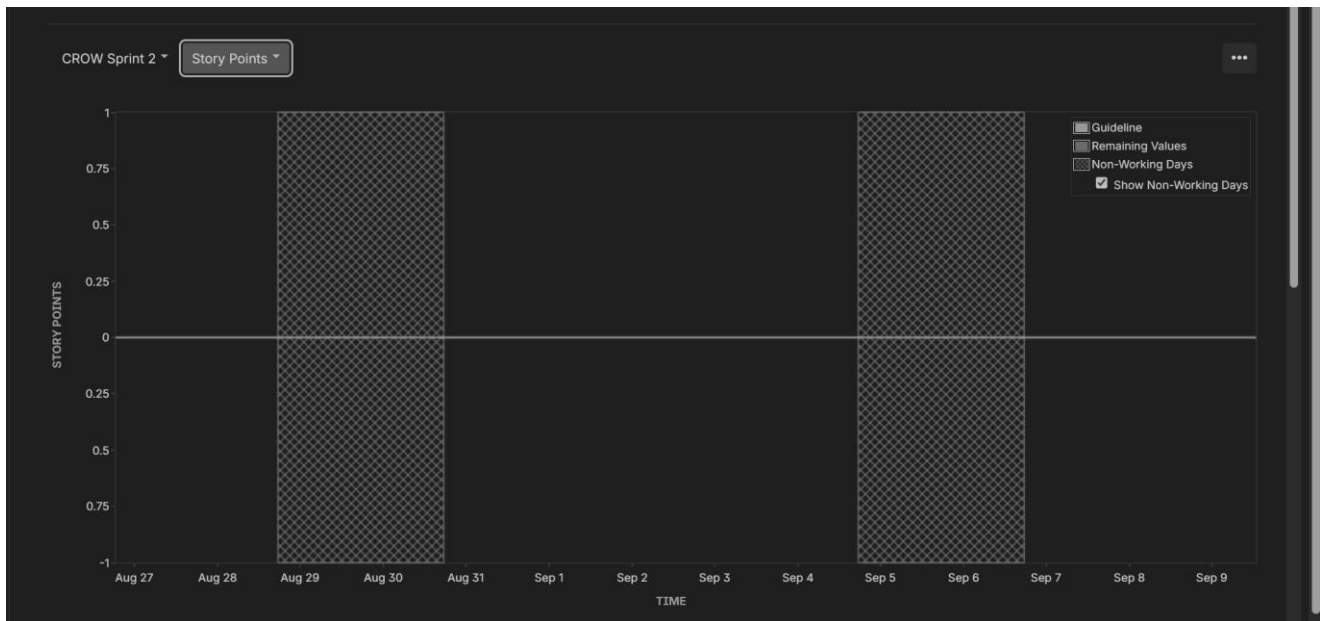

Sprint 1 Burndown Progress

Sprint 1 Burndown Details and Completion

Date	Issue	Event Type	Event Detail	Inc.	Dec.	Remaining
26/Aug/26 6:35 PM	CROW-10	Sprint start		1		
	CROW-11			1		
	CROW-6			1		
	CROW-7			1		
	CROW-8			1		
	Total					5
	CROW-6	Burndown	Issue completed	1		4
26/Aug/26 6:36 PM	CROW-8	Burndown	Issue completed	1		3
	CROW-11	Burndown	Issue completed	1		2
	CROW-7	Burndown	Issue completed	1		1
	CROW-10	Burndown	Issue completed	1		0
	CROW-10	Sprint ended by xyz				0
	CROW-11					0
	CROW-6					0
	CROW-7					0
	CROW-8					0
	Total					0

Sprint 2 Story Points Report

Reflection Answers:

1. Did your estimations reflect the actual effort?

Yes. The story point estimates gave a good idea of the relative effort and difficulty of each user story. Since the sprint was simulated, the estimates were mainly useful for comparing which tasks were easier or more complex.

2. Was your backlog well-prioritized?

Yes. The backlog was prioritized based on the importance of each requirement and its impact on the users. Important features such as reservation, authentication, equipment availability, and cancellation were given higher priority than supporting features.

3. How did your simulated sprint align with your plan?

The simulated sprint followed the planned Agile workflow. The selected user stories were moved through To Do, In Progress, and Done. Two sprints were completed successfully, which helped us understand how backlog items can be planned, tracked, and completed within a sprint.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart helped us see how much work was completed and how much work was still remaining during the sprint. It also showed our progress compared with the expected progress. Since the sprint was simulated, it mainly helped us understand how burndown charts can be used to track sprint progress and estimate the team's capacity.
